Sustainability Conference to Feature Student Poster Session
Registration for SusTech 2016 Is Still Open

Phoenix, AZ. In a recent *LinkedIn* post, Michael Crow, president of Arizona State University, reminds readers that over the last two centuries, the values of liberty and justice and equality have not only represented core aspirations, they have given impetus and direction to the United States' drive for self-improvement and self-fulfillment. Crow goes on to say, *"But in this 21st century, another aspirational value needs to reach the same core level. That is **sustainability**, a fundamental principal and guidepost that asks us as individuals and as a society to reflect on our role in the world and our relationship to nature and the Earth."*

Sustainability goes beyond our own needs and well-being for the near-term; it represents our commitment to future generations and the need for greater balance if we are to survive. SusTech 2016 is designed to bring leaders in sectors that include industry, academia, and government together with like-minded individuals who are interested in exploring the development and application of science, engineering and technology to promote sustainability.

SusTech 2016 also represents a commitment to future generations by including them as participants via a **Student Poster Contest**. Undergraduate and graduate students have submitted ideas or designs for developing projects/products supporting the sustainability topic areas of the conference. Selected posters will be displayed during the SusTech 2016 Student Poster Session on **Sunday, October 9th** from 3 to 7 p.m.

The conference will be held on October 9-11, 2016 at the Phoenix Airport Marriott, 1101 North 44th Street, Phoenix, Arizona 85008, USA.

Registration for SusTech 2016 is still open. For more details go to: http://sites.ieee.org/sustech/

About IEEE and IEEE Region VI: IEEE is the world's largest technical professional organization dedicated to advancing technology for the benefit of humanity. IEEE and its members inspire a global community to innovate for a better tomorrow through its highly cited publications, conferences, technology standards, and professional and educational activities. IEEE is the trusted "voice" for engineering, computing, and technology information around the globe. IEEE Region 6 is home to organizational units in the western United States. Find us on the web at www.ieee.org.
